LocBin™ Wall Systems

For All LocBin™ Model Numbers:

3-210, 3-220, 3-235, 3-240

Thank you for purchasing the patented LocBin™ Wall System from Triton Products. LocBins™ are the strongest, most heavy duty hanging and interlocking bins available.

Your new LocBin Wall System™:

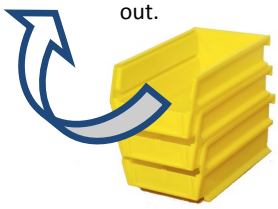
The first thing you will notice is that they are shipped nested together to save space during shipping. Pull/slide them apart and then stack and interlock using the top channel and you're ready to hang on the included Wall Mount Rail. Like all hanging bins they will also hang on a louvered panel.

Peace of mind:

Enjoy the unique benefits of LocBin™ as there are no concerns that your bins will fall apart and topple when stacked. Don't worry, LocBins will never fall into each other and accidentally spill contents. A stack of LocBins can be transported to your work area and set on any flat surface without concern that the bins will separate from one another, fall or mix your items.

De-nesting LocBins™:

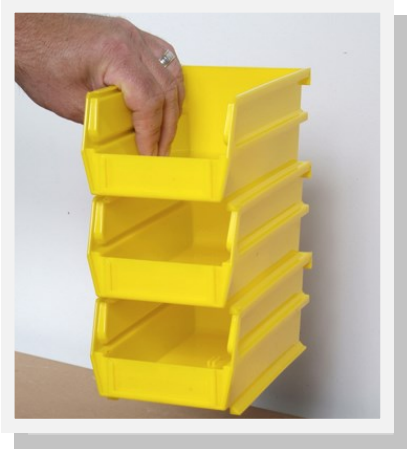
Pull top bin up and out.

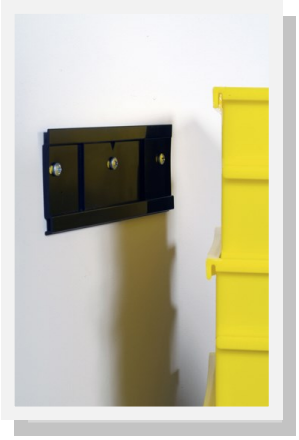


Bins are tightly held together in the bottom sliding track. There is a stop at the front of each of the bins so they do not accidentally slide apart.
For 3-235 and 3-240 bins: Flip the bins over and apply pressure to the top bins for easy de-nesting.

Interlocking LocBins™:

After de-nesting LocBins, you can interlock them by inserting the bottom track of a bin into the top track of another. Bins will lock together. (pictured below)





1) Level and install the 5-600 wall mount rail. Ensure that the wall mount rail is level and tightly secured to the wall so that LocBins™ will stay put .

Wall-Mounting Installation

2) Hang your LocBins™ on the 5-600 wall mount rail by inserting the back lip of the bin to the top lip of the wall mount rail. Enjoy your new LocBin™ wall mount rail system for years to come!

Use LocBin™ dividers for storing multiple items in a single bin.

3-210 LocBins use 4-210 dividers

3-220 LocBins use 4-220 dividers

3-235 LocBins use 4-235 dividers

3-240 LocBins use 4-240 dividers

Part Number	Load Capacity
5-600 Wall Mount Rail	40 lbs.
